Education Industry

Background Research

The educational system has been shifted its paradigm in the advent of pandemic. The demand for **online learning platform** or **live streaming class services** (such as zoom) are highly increased since It allows students to take classes wherever they are.

Online Learning Registration Growth

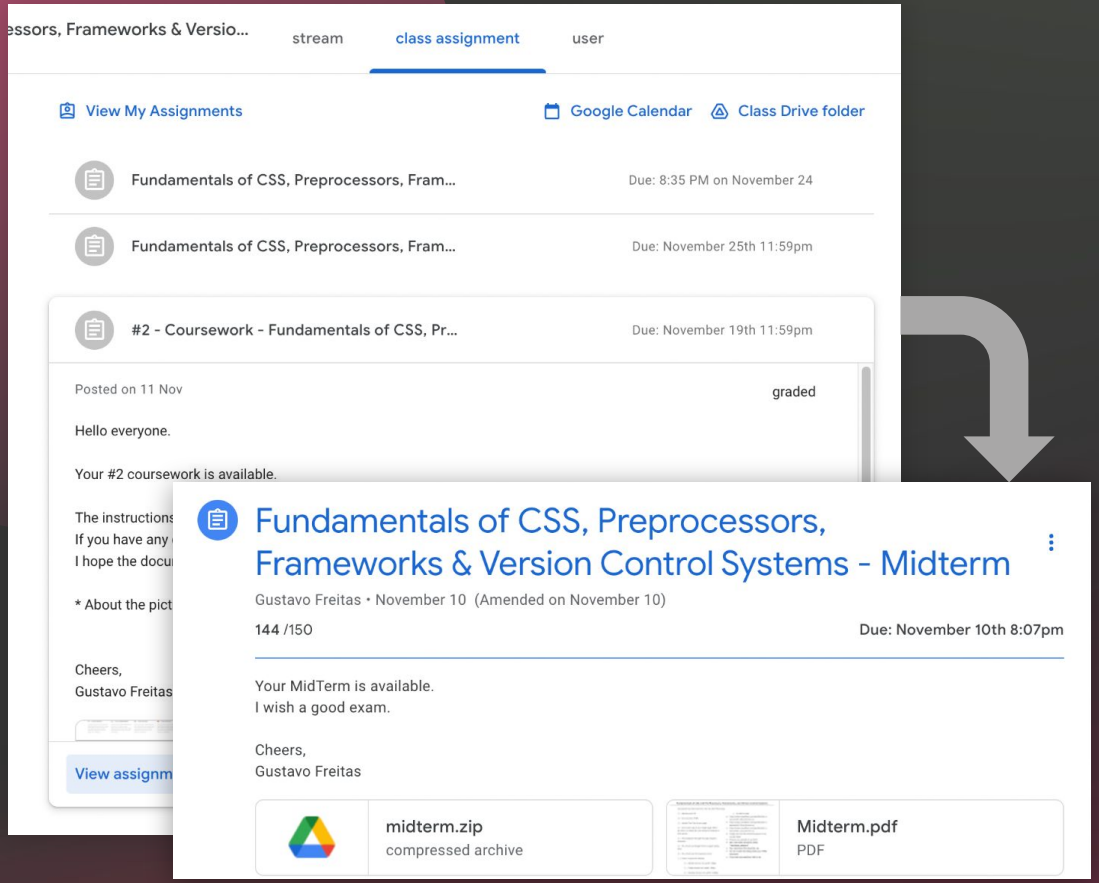

More than 20 million new learners registered for courses in 2021. Image: Coursera

+20 million

In 2021

More learners are accessing online learning

Major Problem

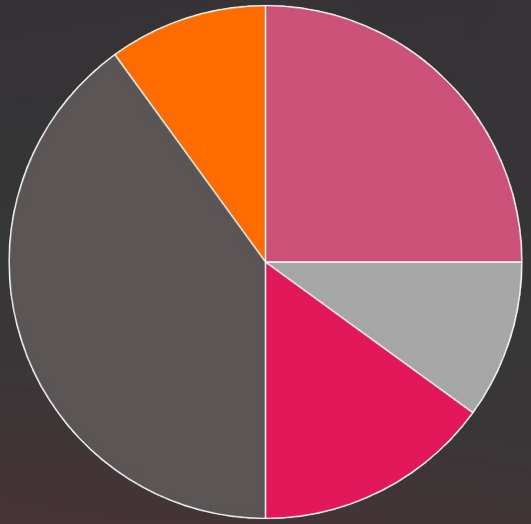

Google Classroom

In the present google classroom, It is hard to see the scores, feedbacks, and the other information at a glance.

Calculating Grade

10%
Attendance
92 / 100

40%
Final exam
103 / 120

25%
Midterm
78 / 80

10%, 15%
Coursework

Competitors Analysis

(Grade Managing system comparison)

	Google Classroom	Moodles	Canvas LMS
View Score & Feedback	✓	△	△
Filter or Sorting options	✗	✓	✓
Calculate Grade by Percentage	✗	△	✗

OUR GOAL

Enhancing the Grade Managing System in LMS

(LMS : learning management system)

- Suggest **new grade management model** to improve the online education facility for student and teacher

Main Functionalities

Registration

Login System

Admin Dashboard

Management for Teacher

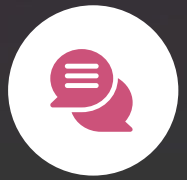

Management for Student

Management for Grade

Grade Table Detail

Grade List	Get Feedback	Sort and Filter	Overall Grade
Show all the grade history for student and teacher	Offer comment section to see a feedback from that assignment/exam	For each student and teacher can filter or sort grade by some specific data	Recalculate the overall grade considering percentage of the assignment/exam

Data Structure

Admin

Manage Teachers & Students info + Grades of students

- Id (automatically incremented)
- email, password, username
- user profile picture
- birthday, address

Teacher

Manage Teachers & Students info + Grades of students

- teacher id
- email, password, username
- course name
- salary, address, birthday

Student

Available to view their own grade

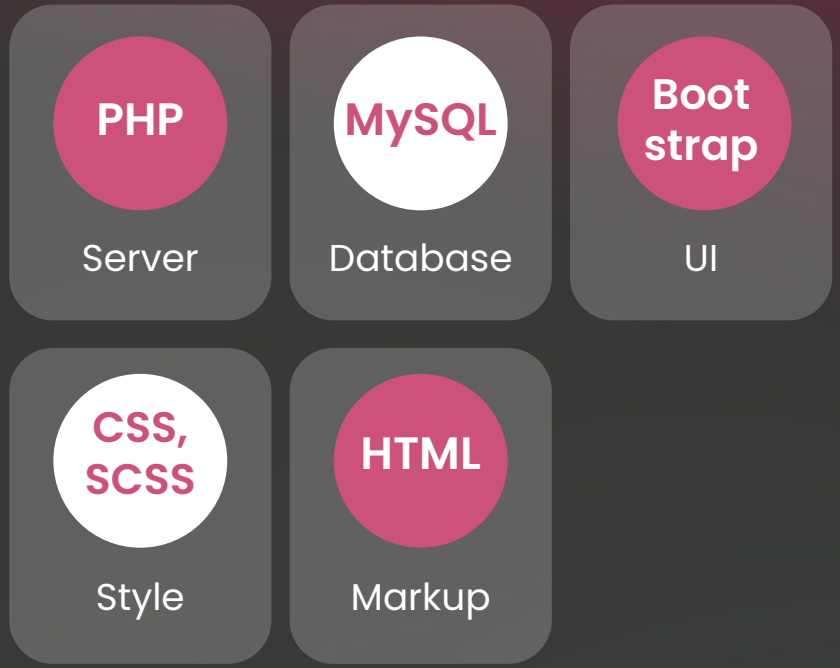

- student id
- email, password, username
- course name, teacher name, teacher id
- address, birthday

Grade

open in modal : read, update the grade

- student id
- email, password, username
- course name, teacher name, teacher id
- address, birthday

Technology

Security Features

- Json Web Token JWT
- HTTP Security Protocol
- MySQL
- OWASP
